Work Experience

Software Developer - Tucasi   **Eastleigh | Nov 20 – Present**

Currently working on school payment apps after previously working on a seat planner app.

- Majority of work has been on the seat planner app built in a custom PHP framework.
- Worked on a laravel REST API to centralise school data.
- Developed Angular frontend school apps which interact with API.
- Built an Android / iOS homework web app using Ionic framework.
- Recently switched to Java as school payment apps are built with it.

PHP Developer - MRI Software   **Sutton Coldfield | July 19 – Oct 20**

Worked in the housing repair services team for MRI software.

- Worked on the House repairs PHP system which provides services to multiple clients.
- Developed a REST API in PHP using Laravel to modernise and migrate functionality off of the legacy system.
- Trained in and worked with C# and Angular to support other apps.

Senior Developer - MoreNiche   **Nottingham | Jan 18 – Jul 19**

MoreNiche is an affiliate network that specialise in fitness products.

- Developed a Laravel API to manage data, also included API testing.
- Worked on a high traffic tracking server built with the Silex PHP framework.
- Worked with both Scrum and Kanban.
- Been on-call outside of work hours to maintain uptime of servers.

Web Developer -   **Stratford-upon-Avon | Jun 16 – Jan 18**
FPS Distribution

FPS distribution is a b2b company providing car parts to their clients.

- Built and migrated features to a new Laravel API to replace the previous one built in NodeJS and Express.
- Worked on Drupal PHP modules for the company's ticketing system and company portal.

Software Developer -   **Loughborough | Jun 15 – Apr 16**
Carphone Warehouse

This carphone Warehouse branch involved work with TalkTalk, E2Save and Mobiles.

- Worked on PHP e-commerce and backend management systems.
- Also worked on an in-store BackboneJS SPA app providing phone deals

Web Developer - Twist Digital   **Nottingham | Apr 13 – Jun 15**

Twist Digital was an affiliate network that provided health, beauty, fitness and adult products.

- Worked on the company's dashboard and tracking apps built with Zend, Silex and MongoDB.
- Maintained uptime of live servers.
- Supported and mentored junior web developers.
